

Rushan Dahal

Full-Stack Developer (MERN Stack)

Phone: 9816995484

Location: Shivasatakshi-4, Jhapa

Email: rushan.official1@gmail.com

GitHub: github.com/rushan009

Summary

Motivated Computer Engineering student with a strong foundation in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js) and working knowledge of C++. Experienced in building real-world applications end-to-end, from UI design to backend integration. Proven hackathon performer with a passion for solving practical problems through technology and continuously learning modern software engineering practices.

Education

Bachelor in Computer Engineering
Kathmandu University, Dhulikhel, Kavre

Sep 2025 – Present

Experience

Frontend Developer

Easy My Learning, Kalaiya

Feb 2026 – Present

- Build responsive, user-friendly web interfaces for educational platforms.
- Create clean, reusable UI components using modern frontend practices.
- Improve user experience and ensure seamless integration with backend services.

Projects

Qure — QR-based Emergency Medical System

GitHub

- Built a QR-based emergency healthcare platform that provides instant access to verified patient medical records during emergencies.
- Designed features for secure authentication, role-based access, and accident-detection workflows.
- **Stack:** React, Node.js, Express.js, MongoDB, JWT.

MeshTalk — Bitchat Clone

GitHub

- Developed an offline-first peer-to-peer messaging application inspired by Bitchat.
- Focused on decentralized communication and local mesh-style networking concepts.
- **Stack:** React, Node.js, Socket.io, WebRTC.

RChat

GitHub

- Built a real-time chat application supporting authentication, online presence, typing indicators, and media sharing.
- Implemented responsive UI and real-time communication features.
- **Stack:** MERN Stack, Socket.io.

Recycle Sathi

GitHub

- Designed a digital waste-management platform connecting households with local recyclers.
- Added pickup scheduling, recyclable item requests, reward points, and environmental impact tracking.
- **Stack:** MERN Stack.

Queue Project (In Progress)

- Developing an intelligent queue-management system with digital token generation, live queue tracking, appointment scheduling, and notifications.
- **Stack:** React, Node.js, Express.js, MongoDB.

Achievements & Hackathons

- **Harvard Health Hackathon (National Level Finalist):** Led a team that built a functional healthcare solution under strict time constraints and presented it to judges.
- Participated in multiple university-level hackathons focused on healthcare, communication, and social-impact technology.

Skills

Languages: HTML5, CSS3, JavaScript (ES6+), C++
Frontend: React.js, Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Database: MongoDB, Mongoose
Tools: Git, GitHub, VS Code, Postman, npm, Vite

Languages

Nepali: Native **English:** Fluent
